tive	Objective	Assessment
rning head, limited range of motion	Cervical ROM: 50% of normal Lumbar ROM: 60% of normal Positive cervical compression test Muscle spasms in cervical and lumbar regions	Cervical strain Lumbar strain Whiplash associated disor
riencing pain with movement	Cervical ROM: 60% of normal Lumbar ROM: 70% of normal Decreased muscle spasms	Cervical strain Lumbar strain Improving
ain decreased by 30%	Cervical ROM: 70% of normal Lumbar ROM: 80% of normal Minimal muscle spasms	Cervical strain Lumbar strain Significant improvemen
wing mild disc bulges	Cervical ROM: 75% of normal Lumbar ROM: 85% of normal No muscle spasms	Cervical strain with disc involv Lumbar strain Continued improvemen
occasional stiffness	Cervical ROM: 85% of normal Lumbar ROM: 90% of normal No muscle spasms	Cervical strain Lumbar strain Good progress
roved function	Cervical ROM: 90% of normal Lumbar ROM: 95% of normal No muscle spasms	Cervical strain Lumbar strain Excellent progress
s, good function	Cervical ROM: 95% of normal Lumbar ROM: 100% of normal No muscle spasms	Cervical strain Lumbar strain Near complete resolutio
s, full function	Cervical ROM: 100% of normal Lumbar ROM: 100% of normal No muscle spasms	Cervical strain Lumbar strain Resolved
